lesson 1

What is ecotourism

Ecotourism is about providing holidays to places which are often **endangered** and **isolated**. The holidays are designed to have a limited **impact** on the local **environment** and to educate tourists about conservation.

Madagascar is famous for its ecotourism and wants to protect its ecosystem (the animals and plants in its environment). 80% of the animals, and 90% of the plants that live there don't exist anywhere else in the word. Lemurs, for example, only live in Madagascar

Egypt is developing ecotourism to protect the environments along the Red Sea coast. Tourists can stay in hotels built of environmentally friendly natural **materials**. friendly natural materials. When tourists go diving they are taught how to avoid damaging the fish and corals.

The Galapagos Islands in **Ecuador** are famous for the **unique** animals, such as the giant turtles which live there. Ecuador makes sure that tourism is **sustainable**. Only a limited number of people can visit islands each year, so the animals and their environment are safe

The Komodo National Park in **Indonesia** is a popular ecotourism destination. Much of Indonesia's endangered wildlife, including the Komodo dragon, can only be found here. The National Park is also famous for its beach with pink sand.

Lesson 3

This is me on our hotel balcony in Sharm El-Sheikh. It's brilliant here and there are loads of things to do. I'm so excited to visit Egypt. The weather's really hot so we spend most of the time in the water.

James

My sister and I are learning to dive with some other teenagers at the resort. I love diving; it's so relaxing and you can see all these amazing fish in the sea. I want to get an underwater camera so I can take photos of them.

Last week we were in Luxor and visited the ancient temples there. I'm not usually interested in history, but I actually found them fascinating and am really glad we went.

Day 10 of my summer holidays! I'm so bored – all my friends are away or busy with their family and I'm stuck here at home. The weather's awful and there's nothing to do.

Katy

Last week I went to stay with my grandparents for a few days which was nice, but they live in a tiny village with no shops. I was helping Granddad in his garden most of the time. He grows all his own vegetables – he says it's cheaper than buying them.

Maybe I'll try and grow some lettuce in our garden when it stops raining. I was watching a programme on TV this morning about gardening– maybe I'll have a new hobby!

Lara's holiday:

Last year we went to Europe to visit my cousins in Portugal. *On the first day*, my uncle met us at the airport and drove us to the old part of town. We walked around Lisbon and I took lots of photos. As I was photographing the castle , my little brother started crying. He was eating an ice cream and a bird stole it! He was very upset. *Next*, my uncle decided to take us to a restaurant for lunch. *After that*, we went to the shops, they are a bit expensive but my mum was

happy. Finally, we sailed along the river to see the sun going down. It was beautiful and very relaxing. It's very quiet and peaceful.

Listening :

Luca :	*Last summer I decided not to go on holiday to Greece with my friends, but do something different.*
Klara :	So where did you go?
Luca :	*Well, as I'm studying Biology I thought I'd go to Indonesia to find out more about the orangutans there. So, I booked a holiday with an ecotourism company and went to Borneo.*
Klara :	What was it like?
Luca :	*A bit of a disaster although I did love the rainforests. When we got to Jakarta, we caught an internal flight to Borneo, but my luggage never arrived so, I had to buy new clothes. The next morning, we took a boat up the river to the orangutan centre and while I was leaning out of the boat to take photos, I dropped my camera.*
Klara :	Oh, no. Did you manage to get it back?
Luca :	*No way, the river's really deep, so I just had to leave it, but I was very annoyed, but at least I had my phone. It took two days to get to the centre so while we were sitting on the boat, the guide told us all about the orangutans and what the conservationists are doing there. It sounded really exciting. When we arrived, the guide introduced us to the people working there and then we had dinner.*
Klara :	What was the food like?
Luca :	*It was mainly rice and vegetables, but they were very spicy. I don't like spicy food, so I only ate the rice. By the end of the week, I was eating the vegetables and fish though I was so hungry.*
Klara :	Well. I'm glad to hear you're not such a fussy eater anymore. What did you do every day?
Luca :	*We got up about six every morning as that's when the sun rises, had breakfast and then trekked into the forest to learn about the orang-utans from the people who are looking after them.*
Klara :	Did you feed them?
Luca :	*No, they're wild animals, not pets. We just observed them, made notes and took photos. We also learnt about other animals, birds and insects in the rainforests. Unfortunately, at the end of the first week, a spider bit me while I was sleeping and my are swelled up.*
Klara :	So what happened?
Luca :	*I had to go to hospital- but as the nearest hospital was 200 km away, I had to go by helicopter. I stayed there for a week all alone and then went back to the centre, but as soon as I got back I was ill. One of the tourists was making the dinner that night and he wasn't a good cook. He didn't clean the fish properly and everybody was sick. I'm staying at home this summer.*

Why tourism is important for Egypt.

Tourism is the second earner of foreign currency for Egypt. Millions of tourists come from all over the world to visit Egypt every year. They come to Egypt for many reasons. They want to enjoy the warmth of the weather and visit all ancient monuments.

Tourism has many advantages for our country. It is a main source to increase national income and develop national economy. Tourists add a lot of money to the income of our country. They spend money on flights, hotels, museums, restaurants and transport. This provides our country with hard currency and provides jobs for the unemployed. Tourism is also important to make visitors know more about our history, culture, customs, traditions and language.

We should increase the number of people visiting Egypt every year by fighting terrorism which is tourism's great enemy. We have to be civilized and friendly to tourists. The government should set up modern hotels and offer accommodations at reasonable prices. Last, but not least, it is a must that we do our best to benefit from tourism.

Working together

Lions are disappearing all over Africa but there is some hope now after the amazing work of an organization called Lion Guardians, which is based in Kenya, but Guardians help in nearby Tanzania. The aim of Lion Guardians is to help local people to protect their own livestock and reduce the number of lion killings in the area.
Cattle are important to the villagers but they often go missing or are attacked by lions. Then the lions are killed as villagers worry about losing more livestock.
Lion Guardians is changing this. The organization works with the community to help both the lions and their livestock and this is done by employing local people. Maasai men are chosen to become guardians as they understand lions and have the skills needed to monitor their movements, find missing livestock and stop hunting parties. They are taught to be field biologists and are given a sense of responsibility.
Lions are tracked everyday and the information is sent to the cattle farmers who can then make sure their cows are safe. Guardians also take part in reducing the number of hunters who come to kill the lions for sport. Lion Guardians is a success story – helping the future of lions as well as the local communities.

Many researchers, engineers and environmentalists are expressing deep (1)concern about changes in the overall climate of the planet. (2)Fossil fuels are being continuously used to produce electricity. The burning of these fuels produces gases like carbon dioxide, methane and nitrous oxides which lead to global warming. (3) Desertification is also leading to warmer temperatures.
The (4) hazard of global warming is continuously causing major damage to the earth's environment. Most people are still (5)unaware of global warming and don't consider it a big problem in the years to come. What most people don't understand is that global warming is (6)currently happening and we are already experiencing some of its (7)withering effects. It severely affects ecosystems and (8)disturbs (9)ecological balance, therefore some solutions must be (10)devised. (11)Alternative energy sources: solar, wind, hydro, (12)geothermal, bio mass need to be seriously(13) pursued. Finding and using renewable sources is one of the (14)methods to (15)combat the ever increasing global warming effectively since the continuous rise in the temperature of the planet is really upsetting. When sunlight reaches the earth 30% of the earth's sunlight is sent back into space, while the remaining is (16)absorbed by oceans air and land. This heats up the surface of the planet. It is caused by (17)anthropogenic activities.

As humans have spread across the world, so have infectious diseases. They have plagued humanity since the earliest days. Even in this modern era, outbreaks are nearly constant, though not every outbreak reaches pandemic level as the Novel Coronavirus (COVID-19) has.
Widespread trade created new opportunities for human and animal interactions that sped up such epidemics as malaria, tuberculosis, leprosy, influenza, smallpox, and others. While the interactions created through trade and urban life play a pivotal role, it is also the virulent nature of particular diseases that indicate the trajectory of a pandemic.
The more civilized humans became – with larger cities, more exotic trade routes, and increased contact with different populations of people, animals, and ecosystems – the more likely pandemics would occur.
Despite the persistence of disease and pandemics throughout history, there's one consistent trend over time – a gradual reduction in the death rate. Healthcare improvements and understanding the factors that incubate pandemics have been powerful tools in mitigating their impact.
In many ancient societies, people believed that spirits and gods inflicted disease and destruction

upon those that deserved their wrath. This unscientific perception often led to disastrous responses that resulted in the deaths of thousands, if not millions. Luckily, humanity's understanding of the causes of disease has improved, and this is resulting in a drastic improvement in the response to modern pandemics. The practice of quarantine began during the 14 th century, in an effort to protect coastal cities from plague epidemics. Cautious port authorities required ships arriving in Venice from infected ports to sit at anchor for 40 days before landing.

Many scientists believe that the earth is slowly getting warmer. Over the past hundred years, the temperature of the earth has increased by about one degree Fahrenheit. Is this cause for alarm? Is the earth's climate changing? If the earth is getting warmer, what do some scientists say is the cause? Whenever something is burned, fuel in a car, coal to make electric power, or trees to clear land for farming, pollution goes into the air. Part of pollution is carbon dioxide gas. When carbon dioxide gets into the atmosphere, it prevents the heat from the sun from escaping from the earth. The heat is needed to keep the earth warm. However, as pollution increases, so does the amount of carbon dioxide. More heat is trapped, and the earth gets warmer. This is sometimes called the "greenhouse effect."The trapped warm air makes the earth much like a greenhouse. A warmer earth could cause the climate to change. Many scientists and environmentalists believe that the only way to stop global warming is to cut down on carbon dioxide pollution. To reach such a goal, people throughout theworld would have to cooperate and look for new ways to reduce pollution.

Choose the correct answer from a, b, c or d:

1 .The "greenhouse effect" causes......
a) more carbon dioxide in the atmosphere b) larger plants and trees
c) global warming d) pollution

2.The earth's temperature has gone up one degree Fahrenheit

In Britain, most schools are financed by the state. Children attend those schools for free. There are many local variations in the details of the school system. The general pattern of schooling in Britain is well organised. All children must start school at the age of five. Many have previously attended play schools or nursery schools, but these are not compulsory. Primary education, whether state or private, seeks to develop all aspects of the child: physical and emotional, as well as intellectual and cultural

aspects. Most schools concentrate on the child's development of his or her potential, rather than on training for a particular exam.
At the age of 11, children move to different schools. These are called secondary schools, and children of all abilities go to the same school, the pupils have a set timetable of subjects, including arts subjects, such as history, English and a foreign language, as well as science subjects and sports. At the end of this period, most pupils take one of two public examinations. After these exams, i.e. at the age of 16 or so, most pupils leave. Pupils usually take a public school - leaving examination. Their results in these exams will largely determine whether they now start to work or they can continue with higher education at a university or college.

Reading

David Copperfield

'This is Mr Quinion, David,' Mr Murdstone said. 'You're going to work for him at Murdstone and Grinby, the bottle merchants, in London. You'll earn enough money to pay for your food, and I've arranged a place for you to live.'

I was ten years old and I was going to go to work. And it was hard work. I went to a dirty old house near the river where rats lived under the floors. There my job was to wash empty bottles with three other boys, and I hated it.

One morning, a plump man came to see me with Mr Quinion.
'Ah, Master Copperfield!' the man said 'This is Mr Micawber,' Mr Quinion told me. 'You will be living at his house.'

And that evening, Mr Micawber took me home. His wife – a thin, tired-looking lady – was sitting with a baby. The baby was one of twins, and they had a boy of four and a girl of three.

I soon discovered that the Micawbers were poor and that Mr Micawber owed money to several people. One morning the police came and took Mr Micawber away to prison because of his debts. I went to see him there the next Sunday.

'If a man earns twenty pounds a year and spends nineteen pounds, he'll be happy,' he said. 'But if he spends twenty pounds and a penny, he'll be miserable.'

I have experienced the work of Tomorrow's Dreamer Youth Association.

Maher:
The Egyptian Red Crescent helps a lot of people every day. When there is a big health problem, we always see the doctors from the Red Crescent on TV. But they also work with communities to stop health problems from happening. One day, I want to do some voluntary work.

Listening (1) :

Charles Dickens

Today millions of people know Charles Dickens for the brilliant books that he wrote. He was a great storyteller. But Dickens didn't only want to entertain people with his books, he also wanted to change their opinions about the world they lived in. He hoped his readers would then do something to make the world a better place. Dickens was most interested in helping poor children because of his own difficult childhood. When he was 12 years old, Charles' father was sent to prison. Like Davide Copperfield, he had to leave school and work to support his family instead. The Poor Law of 1834 removed support for most poor people so their lives were hard. When he wrote David Copperfield between 1849 and 1850, Dickens wanted to show us that not all poor people were bad. Like his father, Mr. Micawber went to prison because he had no money but after he left prison, he wanted to help David because he was a good man. In Dickens' books, people who worked hard were also often rewarded. For example, at the end of the book, David Copperfield becomes a successful writer. Dickens also wanted to say that rich people needed to do something to help the poor. In David Copperfield, a man called Mr Wickfield helps David by giving him a room. Dickens thought that people like Mr Wickfield were honest and good and deserved to be rewarded. Other people in the book, on the other hand, were bad and he had unhappy end.

***The* Listening (2) :**

Let's talk about how to write a great short story. It's important to plan your story. It should have four parts. At the start, we find out when and where the story is happening and we meet the main character. Don't spend too much time describing places and people- your characters need to do something from the start. In the second part of the story, the main character has a problem or something goes wrong. It's a good idea to have two or more problems. After that, the problem or problems are solved and everything is OK again. In this third part of the story, there should be a surprise for the reader. Finally, we find out what the characters do next, so, what happens to them when things are OK again

New in town

It's day one at a new school in a new town. You've got all the paper and pens you need. You're wearing cool new clothes. But you don't know anyone and you're not sure where to go. Starting at a new school feels so hard because
you don't have any friends there to help you. It's very easy to feel stressed, but life will get easier. Here's some advice to help you. Don't take it for granted that other students will start a conversation. Ask other people questions about themselves. Everyone likes talking about themselves. Try asking them about their favourite subjects or which sports they like and don't ask too many personal questions. You can only make friends if you spend time with them! The best way to do this is to join clubs or do team sports you like. Go online or look at the noticeboard at your school and find out what's happening. If you're par t of a team, your teammates will feel connected to you and that connection could become a friendship. While you're busy talking to other students, don't forget to study. Remember to do your homework so you don't have any problems with your teachers. Those teachers can also give you some advice on how to make friends and enjoy life in your new town. Talk to them too

Subject : Help! I don't have any friends at my new school.
Dear Aunt Carol,
I think it is difficult to make friends. I don't have any friends at my new school.
I am always on my own at break-time. Yesterday, I talked to a girl in my class. I asked her if she wanted to do some homework with me but she said no.
I need some advice about how to make friends.
Do you have any advice for me?

Subject : Help! I'm really stressed!
Dear Aunt Carol,
I always work very hard at school, but I'm really stressed about some exams I have next week. The first two exams are 3 hours long and will be verydifficult. The last exam is in a subject I'm not very good at. I've spent a lot of time in the library this week, but that hasn't helped me feel better.I need some advice about how to relax. Please.

Listening (1) :

Radio show host :	*Good evening everyone. Welcome to the show. Tonight, we're talking about bullying. Unfortunately, a lot of teenagers are bullied at school, and this can have some very negative effects on them. We're going to talk to a 15-year-old boy called Ali, who is being bullied. Ali.........are you on the line?*
Ali :	Hi, Seleem. How are you?
Radio show host :	*I'm well, thank you. How are you this evening?*
Ali :	I'm OK, but last week was really hard. Two boys in my class are bullying me because I am not very good at football. I like to play chess more than football. Last week they hid my rucksack. It had all my school books in it. I hate going to school now.
Radio show host :	*Oh, no! That's terrible. Did you tell a teacher?*
Ali :	No, I didn't. I was too scared. I've just moved to this town, so I don't know the teachers very well.
Radio show host :	*Well, Ali, I really think you should talk to a teacher. Your teacher can talk to the bullies and make it clear that they shouldn't behave like this. If you do nothing, the bullying will just continue.*
Ali :	Yes, ...you're right...There's one teacher that I get along well with. I'll talk to him.

Listening (2) :

Ola :	*So, do you think moving to a new school in another town is a good thing or a bad thing for teenagers?*
Lina :	As far as I'm concerned, It's not a good idea. If you move to a new school, you have to leave your old friends behind and it's really difficult to make new friends.
Ola :	*I'm not so sure about that. I think you can make new friends if you're nice to other people and start conversations with them. For example, I'm sure you would make lots of new friends!*
Lina :	That's true. It is possible to make new friends, but it takes time. You'll be really lonely for the first few months.
Ola :	*In my opinion, it's a good experience to have because it makes you stronger.*
Lina :	I know that it can make people stronger, but I would prefer to just stay with the people I know.

Sleep is very important for our health and safety. We should get enough sleep in order to let our brains work properly. Scientists have found that sixty percent of adults suffer from sleep deprivation. If we don't sleep well for a long time, we may get sick because the body loses its ability to fight infections. Also, we may have accidents because we do not concentrate on what we are doing. Many drivers have car accidents as a result of sleep deprivation.

How much sleep do we need? An average of eight hours of sleep a night gives our bodies good preparation for the next day. To help us sleep, we should set regular times for bed

and wake up. Also, we shouldn't drink a lot of caffeine such as cola, tea and coffee during the day. We should try to avoid eating, studying or watching television in bed because bed is meant for sleep. If we follow this advice, we should feel healthier and have fewer accidents.

The internet of things

1 Linking the the world

Communication is no longer about people talking to one another, but about machines talking to machines. This is known as the Internet of Things (IOT). Technology is developing so fast that experts believe everyone will be connected to the IOT in a few years.

2 Connecting our homes

Many things in our own homes are going to be connected to the IOT. Already, people can control their heating and lighting from their phones, but in the future computers will make the decisions for us. They'll even be able to say when the rubbish bins need to be emptied and control how much water we use!

3 No more driving

Cars can already connect to the internet using smartphones, but imagine if you can get a driverless car to come and collect you using an app on your phone. All driverless cars will be electric and much cleaner than petrol ones. Experts think our roads will be safer as there will be fewer accidents using driverless cars.

4 Possible problems

Many people don't think IOT is safe enough yet. Computers collect information about people and businesses which criminals can steal. They use this information to hack into organisations like hospitals, power stations and airports, and cause major security problems

Working together

Last week, I was playing online when I saw an advert for a free game. I clicked on the link and wrote my name, address and some bank details. When I tried to download the game, nothing happened. It was a scam.

My dad was furious because they stole money from his bank account and my computer stopped working properly! Don't click on links you don't recognize and never give your personal details on a strange website. Oh, and remember to use anti-virus software to stop thieves

Listening

Hassan :	*Last week I was reading about a new online game and saw an advert that said I could get this game for free. All I had to do was complete a form with my name, email address and credit card details. I don't have a credit card, but I sometimes use my dad's card to buy things. Of course it was a scam. They just wanted the credit card details so they could steal money,*

	but it looked just a real advert. I think lots of kids would be so excited to get a free game they wouldn't think carefully about it.
Laila :	I'm leaving school this year and I want to get a job in a bank. My teacher told me that employers often look online to see what we've posted, so I decided to google my name to see what they may find. It was scary. All the photos and the 'funny' comments I'd ever posted were there and I couldn't delete them. I didn't realize it's almost impossible to remove personal data from the internet.
Saeed :	*I love reading my friend's social media posts, but some people write really horrible things about other teenagers. One of my friends posted a photo of himself on his new bike and he got lots of rude comments about how he looked and how ugly his bike is. I couldn't believe it! These kids would never, never bully my friend at school, so why do it online? I'm really careful about what I say on the internet now!*

But there are still parts of the world today

where coins and notes of no use. They will buy nothing, and a traveller might starve if he had none of the particular local"money" to exchange for food. Among isolated people, who are no often reached by traders from outside, commerce usually means barter.This is a direct exchange for pots, baskets, or other manufactured goods. For this kind of this trading, money is not needed, but there is often something that everyone wants and everybody can use, such as salt to flavor food, shells for ornaments, iron and copper to make into tools and vessels. Biography about(Robert Louis Stevenson)

Robert Louis Stevenson was born in Scotland in 1850 and died 44 years later in Samoa, a small island in the south Pacific. He was not always well because the weather in Edinburg was too cold for him.
When he was a child he couldn't always go to school. He studied to become a lawyer at Edinburg University, but he always wanted to write. At the age of 21 he decided to become a full-time writer. He often travelled to warmer places to try to improve his health. For a while he lived in France and this was where he met his wife, Fanny. She was from the United States, so Stevenson also travelled to America with her. Although he is best known for his novels, like *Kidnapped* and *Strange Case of Dr Jekyll and Mr Hyde*, Stevenson also wrote many poems and travel books. His first successful novel was *Treasure Island* – an adventure story about pirates. His books are still very popular today and many of them have been made into films.

The Gardener

The gardener does not love to talk.
He makes me keep the gravel walk;
And when he puts his tools away,
He locks the door and takes the key.
Away behind the currant row,
Where no one else but cook may go,
Far in the plots, I see him dig,
Old and serious, brown and big.
He digs the flowers, green, red, and blue
Nor wishes to be spoken to.
He digs the flowers and cuts the hay,
And never seems to want to play.

Bed in Summer

In winter I get up at night
And dress by yellow candlelight.
In summer quite the other way,
I have to go to bed by day.
I have to go to bed and see
The birds still hopping on the tree,
Or hear the grown-up people's feet
Still going past me in the street.
And does it not seem hard to you,
When all the sky is clear and blue,
And I should like so much to play,
To have to go to bed by day?

Two opinions about the poem Bed in Summer:

Khaled, 4:04 PM
The words Stevenson has used very clearly describe the situations he's writing about and I really like that. I also think the poem's subject is very

interesting because everyone feels differently in different seasons. In my opinion, poets should write about everyday life. However, I think the second verse is too long and its rhythm is too slow.

Hamid, 5:36 PM
I love the language in the poem, especially the way Stevenson describes the light at different times of day. I also think the second verse is great because the rhymes in it are so clever. However, in my opinion, the poem's subject is quite boring because going to bed and getting up aren't very interesting activities. I think poets should write about more exciting things.

Listening:

Teacher :	*This week we're studying the Scottish writer, Robert Louis Stevenson, in particular his poetry not his novels. Have any of you heard about him or read any of his works?*
Nesma :	Didn't he write Treasure Island? I tried reading it last year, but it was a bit boring, so I decided to watch the film instead.
Teacher :	*Did you like it?*
Nesma :	Yes, it was really good. I love adventure films and I enjoy reading adventure stories too. I just found Treasure Island a bit difficult.
Teacher :	*Well, it was written a long time ago. He was born in 1850 and Treasure Island was published in 1881. And Wafaa, have you read any of his books?*
Wafaa :	I don't think so. I prefer reading romantic stories and poems.
Teacher :	*Well, Stevenson wrote poems too. In fact he wrote all kinds of things. He began writing stories when he was a child and unwell. Unfortunately, Stevenson was often very ill and he finished writing Treasure Island while he was ill in bed. He continued to write more books, including a collection of poems called A Child's Garden of Verses and he also travelled a lot to get away from the cold Scottish weather.*
Nesma :	Where did he go?
Teacher :	*As a young man, he went to Europe, France and Switzerland mainly. In fact, his first book was about his travels in France. He and his family loved sailing and they wanted to sail from America, where they were living, to the South Pacific. The family chose to build a house in Samoa and the Stevenson family lived there until he died in 1894. Now for this week's lesson I want you to choose a story or poem by Stevenson and bring it to class to discuss. Then……………*

Sara's paragraph about Bed in Summer:
My favourite poem is Bed in Summer because it describes how I felt when I was young. In the summer I had to go to bed when it was light and I hated it. Like the author I
wanted to be outside playing and I didn't think it was fair that everyone else was outside having fun. It's good length for a

poem, only three verses and I like the fact that the words rhyme. I don't like poems which don't rhyme. The first two lines rhyme, '*night*' and '*light*' and then the next two lines rhyme, '*way*' and '*day*'. This makes it easy to say and easy to remember. Robert Louis Stevenson was ill when he was a child and stayed in bed a lot. That's why I think he wrote this poem.

3.Read the following passage, then answer the questions:

Successful marriage is the most effective form of social support; it relieves the effects of stress, and leads to better mental and physical health. While many studies have shown the great importance of social support, it is still clear exactly what this means. Most likely it consists of being a sympathetic listener or offering helpful advice; providing emotional support and social acceptance; giving actual help or financial help, and simply doing ordinary things together, like eating and drinking. Husbands seem to benefit much more from marriage than wives do. Married women are in better physical and mental health, and are happier than single women, but these effects are nearly twice as great for men. Various explanations have been considered, but the most plausible is that wives provide, more social support than husbands. Perhaps men need it more? They are more exposed to stresses at work, have worse health, and die earlier than women.

3. Read the following passage, then answer the questions:

' Agriculture is the science and art of cultivating plants and livestock. Agriculture was the key development in the rise of settled human civilisation, by which farming of domestic species created food surpluses that enabled people to live in cities. After gathering wild grains, nascent farmers began to plant them around 11,500 years ago. Pigs, sheep and cattle were domesticated over 10,000 years ago. Industrial agriculture based on large-scale monoculture in the twentieth century came to dominate agricultural output, though about 2 billion people still depended on subsistence agriculture into the twenty-first.

Modern agrochemicals such as pesticides and fertilisers, and technological developments have sharply increased yields, while causing widespread ecological and environmental damage. Selective breeding and modern practices in animal husbandry have similarly increased the output of meat, but have raised concerns about animal welfare and environmental damage Environmental issues include contributions to global warming, deforestation, antibiotic resistance, and growth hormones in industrial meat production. Genetically modified organisms are widely used, although some are banned in certain countries. The major agricultural products can be broadly grouped into foods, fibres, fuels and raw materials food classes include cereals, vegetables, fruits, oils, meat, milk, and eggs. Over one-third of the world's workers are employed in agriculture, second only to the service sector, although the number of agricultural workers in developed countries has decreased significantly over the centuries.
